| MYP Year 1 (6th Grade) Math 6 |  |  |  |  |  |  |  |  |  |  |  |
| September to October |  |  |  |  |  |  |  |  |  |  |  |
| Integers \& Coordinate Plane | Logic | Models, Justification | Identity and <br> Relationships: Explore and choose how to express real world situations with integer models on their conceptual level. | Using reasoning and logic, students can identify integer relationships and justify this reasoning with models of integer relationships. | $\begin{aligned} & \text { A: i., ii., iii. } \\ & \text { D: i. } \end{aligned}$ | Self-management and thinking skills | $\begin{array}{\|l\|} \hline 6.3(a-c) \\ 6.4 \\ 6.6(a-c) \\ 6.8(a-b) \end{array}$ | Math 6 Unit Test | Balanced, Open-minded |  |  |
| October to December |  |  |  |  |  |  |  |  |  |  |  |
| Operations with <br> Fractions and Practical Problems with Decimals \& Comparing Fractions, Decimals, and Percents. | Relationships | Equivalence, Representation | Identity and <br> Relationships: Explore and choose how to model real world situations using fractions, decimals and percents. | Using reasoning and logic, students will identify fractional relationships and justify with models. | $\begin{aligned} & \text { A: i., ii., iii. } \\ & \text { D: i. } \end{aligned}$ | Self-management and thinking skills | $\begin{aligned} & 6.5(a-b) \\ & 6.5 c \\ & 6.2(a-b) \end{aligned}$ | Math 6 Unit Test Food Pyramid Project | Balanced, Open-minded |  |  |
| December to January |  |  |  |  |  |  |  |  |  |  |  |
| Ratio and Proportional Reasoning | Relationships | Equivalence, Representation | Identity and <br> Relationships: Explore and choose how to model real world situations using ratios and proportional reasoning. | Using reasoning and logic, students will identify and justify ratios and proportional reasoning with representations. | $\begin{aligned} & \text { B: i., ii., iii. } \\ & \text { D: i., ii., iii. } \end{aligned}$ | Thinking skills | $\begin{aligned} & 6.1 \\ & 6.12(a-d) \end{aligned}$ | Math 6 Unit 3 Quiz and Test | Thinkers |  |  |
| January to February |  |  |  |  |  |  |  |  |  |  |  |
| Equations \& Inequalities | Logic | Simplification, Equivalence | Identity and <br> Relationships: Explore and choose how to model real world situations using equations and inequalities. | Using reasoning and logic, students will use their understanding of balance to simplify equations and inequalities. | $\begin{aligned} & \text { B: i., ii., iii. } \\ & \text { C: i., ii., iii., iv., v. } \end{aligned}$ | Self-Management skills | $\begin{aligned} & 6.13 \\ & 6.14(a-b) \end{aligned}$ | Math 6 Unit Quiz and Test | Balanced |  |  |
| March to April |  |  |  |  |  |  |  |  |  |  |  |
| Geometry 1-2: <br> Perimeter, Area, Circles, <br>  <br> Congruence | Relationships | Space, Approximation | Scientific and technical innovation: <br> Mathematical puzzles, principles and discoveries | Using a logical process involves the use of patterns and approximation helps us to understand the world. | $\begin{array}{\|l\|} \hline \text { A: i., ii., iii. } \\ \text { D: i., ii., iii., v. } \\ \hline \end{array}$ | Research skills | $\begin{aligned} & 6.7(a-c) \\ & 6.8 \mathrm{~b} \text {-polygons } \\ & 6.9 \end{aligned}$ | Math 6 Quiz | Reflective |  |  |
| April to May |  |  |  |  |  |  |  |  |  |  |  |
| Circle Graphs and Measures of Center | Communities | Models, Representation | Identities and relationships: lifestyle choices | Using data and representations helps develop an understanding of individuals and society. | $\begin{aligned} & \text { C: i., ii., iii., iv. } \\ & \text { D: i., ii., iii., iv., v. } \end{aligned}$ | Research skills | $\begin{aligned} & 6.10(a-c) \\ & 6.11(a-b) \end{aligned}$ | Survey Project | Inquirers |  |  |
| June |  |  |  |  |  |  |  |  |  |  |  |
| Decision Making | Global interactions | Systems, Representation | Identities and relationships: Physical, psychological and social development; transitions; health and wellbeing; lifestyle choices | Using data and representations helps develop an understanding of an individual's place in society. | $\begin{aligned} & \text { C: i., ii., iii., iv., v. } \\ & \text { D: i., ii., iii., iv., v. } \end{aligned}$ | Communication and Research skills | 6.1-6.14 | Budget Project | Communicator s |  |  |
| MYP Year 1-2 (6th-7th Grade) Math 7 |  |  |  |  |  |  |  |  |  |  |  |
| September to October |  |  |  |  |  |  |  |  |  |  |  |
| Rational Number Sense | Logic | Approximation, Equivalence | Scientific and technical innovation | Solving mathematical puzzles requires logic and may use approximation to determine equivalence. | $\begin{aligned} & \text { A: i., ii., iii. } \\ & \text { B: i., ii., iii. } \end{aligned}$ | Self-management and thinking skills | $\begin{aligned} & 7.2 \\ & 7.1 \mathrm{~d}, \mathrm{e} \end{aligned}$ | Unit Test | Thinkers |  |  |

| November |  |  |  |  |  |  |  |  |  |  |  |
| Expressions, Equations, and Inequalities | Relationships | Equivalence, Models | Fairness and development: Inequality, difference and inclusion | Models can be used to show relationships comparing expressions. | $\begin{aligned} & \text { A: i., ii., iii. } \\ & \text { B: i., ii., iii. } \end{aligned}$ | Self-management and thinking skills | $\begin{aligned} & 7.11 \\ & 7.12 \\ & 7.13 \end{aligned}$ | Unit Test Pattern Recognition | Communicator s |  |  |
| November to December |  |  |  |  |  |  |  |  |  |  |  |
| Proportional Reasoning | Relationships | Representation, Justification | Personal and Cultural Expression: <br> Metacognition and abstract thinking | In different cultures, relationships and customs are represented through a variety of traditions and abstract thinking. | $\begin{aligned} & \text { A: i., ii., iii. } \\ & \text { C: i., ii., iii., iv., v. } \end{aligned}$ | Thinking skills | $\begin{aligned} & 7.3 \\ & 7.5 \end{aligned}$ | Math Poster | Open-Minded | Students cook a meal to meet from another country and scale the recipe from 4 to 10 people. |  |
| January |  |  |  |  |  |  |  |  |  |  |  |
| Slope and Linear Functions | Relationships | Space, Representation | Orientation in Space and Time: Scale, duration, frequency and variability | Relationships between two variables can be represented across space and time. | $\begin{aligned} & \text { A: i., i.i., iii. } \\ & \text { D: i., ii., iii., iv., v. } \end{aligned}$ | Communication and Thinking skills | 7.1 | Unit Test | Communicator s |  |  |
| February |  |  |  |  |  |  |  |  |  |  |  |
| Probability and Statistics | Logic | Representation, Patterns | Globalization and Sustainability: Commonality, diversity and interconnection | Logic can be used to determine patterns and create representations with data. | $\begin{aligned} & \text { A: i., ii., iii. } \\ & \text { B: i., ii., iii. } \end{aligned}$ | Research and Thinking skills | $\begin{aligned} & 7.8 \\ & 7.9 \end{aligned}$ | Unit Test | Inquirers |  |  |
| March to April |  |  |  |  |  |  |  |  |  |  |  |
| Volume and Surface Area | Relationships | Space, Quantity | Orientation in Space and Time: Scale, duration, frequency and variability | Relationships between shapes and spaces that vary in predictable patterns. | $\begin{aligned} & \text { A: i., ii., iii. } \\ & \text { C: i., ii., iii., iv. } \end{aligned}$ | Research and Thinking skills | 7.4 | Unit Test | Balanced |  |  |
| April |  |  |  |  |  |  |  |  |  |  |  |
| Powers of 10 and Scientific Notation | Form | Quantity, Equivalence | Orientation in Space and Time: Scale, duration, frequency and variability | Equivalences exist between different forms and quantities of numbers. | $\begin{aligned} & \text { A: i., ii., iii. } \\ & \text { B: i., ii., iii. } \\ & \text { C: i., ii., iii., iv. } \end{aligned}$ | Communication and Thinking skills | 7.1 a, b, c | Unit Test | Inquirers |  |  |
| May |  |  |  |  |  |  |  |  |  |  |  |
| Quadrilaterals | Form | Patterns, Shape | Scientific and technical innovation: mathematical puzzles | Patterns exist among a variety of shapes and forms. | $\begin{aligned} & \text { A: i., ii., iii. } \\ & \text { B: i., ii., iii. } \\ & \text { C: i., ii., iii., iv. } \end{aligned}$ | Communication and Thinkings skills | 7.6 | Unit Test | Knowledgeable |  |  |
| June |  |  |  |  |  |  |  |  |  |  |  |
| Transformations | Relationships | Change, Representation | Orientation in Space and Time: Scale, duration, frequency and variability | Changes in and relationships among data can be represented in graphs. | $\begin{aligned} & \text { A: i., i., iii. } \\ & \text { D: i., ii., iii., iv., v. } \end{aligned}$ | Research and Thinking skills | 7.7 | Unit Test | Reflective |  |  |
| MYP Year 1-3 (6th-8th Grade) Pre-Algebra |  |  |  |  |  |  |  |  |  |  |  |
| September |  |  |  |  |  |  |  |  |  |  |  |
| Integer Operations and Coordinate Plane | Logic | Models, Justification | Identity and Relationships | Logic can be used to identify integer relationships and justify this reasoning with models of integer relationships. | $\begin{aligned} & \text { A: i., ii., iii. } \\ & \text { D: i. } \end{aligned}$ | Thinking and SelfManagement skills | $\begin{aligned} & \hline 6.3 \\ & 6.4 / 7.1 \mathrm{~d} / 7.1 \mathrm{e} / 8 . \\ & 3 \\ & 6.6 / 7.2 \\ & 6.8 \\ & \hline \end{aligned}$ | Unit Test | Thinkers |  |  |
| October to November |  |  |  |  |  |  |  |  |  |  |  |
| Expressions, Equations, and Inequalities | Relationships | Models, Equivalences | Fairness and development: Inequality, difference and inclusion | Models can be used to show relationships comparing expressions. | $\begin{aligned} & \text { A: i., ii., iii. } \\ & \text { B: i., ii., iii. } \end{aligned}$ | Research and Self- <br> Management skills | $\begin{aligned} & \hline 6.5 \\ & 6.13 / 7.12 \\ & 7.11 / 8.14 \\ & 6.14 / 7.13 \\ & 8.17 \\ & 8.18 \\ & \hline \end{aligned}$ | Unit Test Pattern Recognition Activity | Inquirers |  |  |
| December to January |  |  |  |  |  |  |  |  |  |  |  |
